

# Typography: JA Purity typography

## From Joomla! Documentation

Wikipedia defines <http://en.wikipedia.org/wiki/Typography>

The JA Purity template has a number of hand coded CSS styles in its typography, and none of the bonus styles are displayed in the Joomla demo platform.

They are listed in the `ja_purity/css/template.css` file under a commented section Bonus Typography Styles. This article covers the various standard typography elements and the "bonus" styles and how to use them. The following images were generated using Firefox 3.0 on a Joomla 1.5.11 platform using JA Purity 1.2 as it accompanied that version of Joomla. Sample code is provided that generated the "bonus styles".

This is a Magazine Style Drop Cap. The first letter in this paragraph is big. JA Purity brings into your Joomla template the magazine drop cap technique and CSS2 includes the first-letter pseudo class. In all fairness to the paragraph itself we probably should type enough to see how it looks when it is surrounded by its textual friends by using more words.

Use `<span class="dropcap">T</span>` to get the dropcap T.

This is a sample Legend. Use `<div class="legend"><h3 class="legend-title">Your title</h3><p>Place your relevant text into the legend here..</p></div>`

#### Legend Title
